

Preetam Sharma

DATA SCIENCE & MACHINE LEARNING

+91 9234493072 | preetamsh12345@gmail.com | linkedin.com/in/preetam-sharma-1b44742a7 | github.com/preetam-sharma-123

Profile

Computer Science Engineering student with hands-on experience in machine learning and deep learning. Skilled in Python, TensorFlow, and Scikit-learn, with a focus on building models that work correctly, not just meeting a metric. Quick to learn new tools and comfortable working in structured, mentor-reviewed settings.

Education

Maharishi Markandeshwar University <i>B.Tech, Computer Science Engineering</i>	Mullana, Haryana <i>Expected May 2027</i>
KIST College, Tribhuvan University <i>+2 (Class 11–12), Computer Science — 80.5%</i>	Kathmandu, Nepal <i>April 2022</i>
The New Summit School <i>Class 10 — 97.5%</i>	India <i>April 2019</i>
Martyrs Memorial School <i>Nursery – Grade 7 — GPA 3.6</i>	Kathmandu, Nepal

Skills

Languages	Python, SQL
Data Science	Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
Deep Learning	TensorFlow, Keras — CNNs, RNN/LSTM/GRU, Autoencoders
ML Algorithms	Random Forest, Decision Tree, Linear/Ridge Regression, K-Means, PCA
Tools	Jupyter, Google Colab, Git/GitHub, Power BI, Excel
Exposure (non-production)	Hadoop/Spark concepts, Google Gemini API (multimodal)

Experience

Celebal Technologies <i>Data Science Intern — Celebal Excellence Internship</i>	Remote <i>May 2026 – Present</i>
- Completing a 6-module internship covering classical ML, deep learning, and unsupervised learning, with each project reviewed against a technical rubric. - Built a denoising autoencoder in TensorFlow/Keras on the MNIST dataset and fixed reconstruction-loss issues. - Built CNN models with data augmentation and batch normalization for CIFAR-10 image classification. - Built RNN, LSTM, and GRU models for text generation in TensorFlow/Keras and compared their results. - Used K-Means clustering and PCA to group countries by socioeconomic data for an aid-priority use case. - Forecasted EV delivery volumes using Ridge Regression with time-series cross-validation.	
YBI Foundation <i>Data Science Intern</i>	Remote <i>May 2025 – Jul 2025</i>
- Cleaned and prepared datasets using Pandas and NumPy, handling missing values and outliers. - Built and compared Random Forest, Decision Tree, and Linear Regression models in Scikit-learn. - Used Matplotlib and Seaborn to explore data and guide model choices. - Documented project workflows and results.	

Projects

Netra AI — Eye Image Screening Tool	<i>Python, Streamlit, Gemini 1.5 Flash API, PIL</i>
- Built a Streamlit app using Google's Gemini API to screen eye images for conditions like glaucoma, cataracts, and retinopathy. - Submitted as an MVP to Google Solution Challenge (Google Developer Program).	
Credit Card Default Prediction	<i>Python, Scikit-learn, Pandas, NumPy</i>
Built a Random Forest model to predict credit card defaults, using feature scaling and handling class imbalance.	
Big Data Practicals	<i>Hadoop, Spark (concepts)</i>
Completed practicals in Hadoop and Spark covering distributed data processing.	

Certifications & Achievements

- Celebal Excellence Internship (CEI) — Celebal Technologies, 2026 (In Progress)
- Data Science Internship Completion Certificate — YBI Foundation, 2025
- Google Solution Challenge Participant — Netra AI submitted as a working MVP
- Scored 97.5% in Class 10 Board Examinations
- Languages: English & Hindi (professional proficiency), Nepali & Bhojpuri (native)
